

Below we have highlighted some of the key measures we have incorporated as part of our elevated care to help eliminate airborne bacteria, viruses, and contaminants.

Air scrubber advanced - Air and surface purification HVAC environmental conditioning system with germicidal UV

HVAC with MERV 13 HEPA filters.

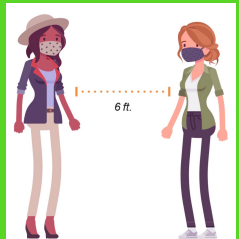

Multiple in room medical grade heavy duty Air Purifiers with 4 layers of filtration with UV light

ADS Extra oral dental suction system droplets and aerosols terminator

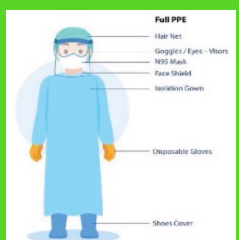

Isolite Intra Oral suction system to capture aerosol right at the site of origin, reducing amount of aerosol generated into the surroundings by approximately 95%

Hospital grade ULV Cold fogging disinfection through the entire office frequently

Sneeze guards in place and adhering to 6ft social distancing guidelines whenever possible.

All waiting room furniture has been replaced with wipeable chairs that can be fully disinfected.

All team members are trained and equipped with proper PPE, and also have daily temperature checks and symptom monitoring.

Patients will be screened prior to appointments for any COVID-19 symptoms, exposure to someone with COVID-19, or recent travel.
